the priests of the convent of San francisco, the scene of
the shorder—and they are between sixty and seventy—
any seven were found in the building at the time the disthehences took place, which was about one o'dook in the
merning. This shows conclusively two things—that only
a very small number of the priests take any interest in
the revolutionary projects of their bretaren, and that all
of them pay very little regard to the rules and
seguiations of their Order, which fobiges them
be within the convent by eight o'clock
the evening, at which hour the gates are
closed. After securing the ringleaders the Prosident
based a decree, declaring too convent and its appurte

seems to me should be sufficient to convince the most
meredicion structure either as home or abroad, that the
President is in earnest.

There have been some disturbances at Ignala, by which the Spanish house of J. M. Coetina & Co. has suitered. But house has always been intermedding in the publics of the district in which they live, and folks generally make they have only got what they deserved.

Matters at the north with Vicasers are much in the mane situation as they have been for some time post. What is therefore very loud with rifles and bisenses. The government pays very little attention to him, and appear to think that they have only to give him rope enough able will hang himself. The resignation of Gov. Garas, of Tampico, created some surprise in this city, but it is emprainly supposed to be the result of a misunderstanding which which will be satisfactorily arranged.

At Ordincame, the people of masse have resisted an invasion from Nueve Leon upon the State of Durar go, made by an armed party under the command of a robber chief, known as Lopez Porthilo. The State is prepared for defence. From the city of Mersico on the 16th, we have notice of the apprehenses no fa band of conspirators, organizing in the Ornvent of San Francisco, where the Battalion of Independence was quartered, which was to be surprised for the use of the mangents. Several officers were made prisoners, one of them Bartdon, the aid of Haro; several farms, two priests, and a number of other persons of less consequence, with the officer of the guard of the battalion quartered there, by whose connivance the consumators were enabled to hold their meeting. Forty or litty men are beindes named in the writs for arreal, who are well known as therees and desperadoes to toe people. The convents of St. Domingo and Augustine were being examined in relation to like charges at last dates. The results are not known.

The government seems to be will advised of all attempts egainst the public peace, and we trust that the norve and integrity of the President may endure to the end.

I informed you of the rrival here of the British scrow steam corvetto Tartar, and that she was about to proceed to the various ports on this station at which the ships of the British sect are knows to rendezvous, to collect together a sufficient with the demands of Great Britain, which I supposed to be "the payment of a debt claimed to be due to E itlah subjects by Mexico." Such supposition, however, I have since ascertained was an error, the cause of the difficulty between Great Britain and Mexico originating as

The house of Barron, Forbes & Co. has long been the one of the greatest importance on the Pacific shores o Mexico, and they have obtained their immense wealth Mexico, and they have obtained their immense wealth chiefly by smuggling, the Custom House officers under Santa Anna having long been rendered by bribery the pliant tools of this large mercantile bouse. Upon the installation of the present government of Mexico, new Costom House officers were of course appointed, who refused to accept the bribes of Barron, Porbus & Co., and the consequence was that that firm exercising the influence of its immense wealth, absolutely got up a revolution. To put down this movement General Degolado went down to Tepic, where finding that Barron & Forbes were the chief instigators of it, he sent both of them to Masatian, by way of keeping them out of mischiof. At tois time Mr. Barron was exercising the functions of British Consul, and Mr. Forbes hose of the United Sates Consular Agent (he having been lett in that capacity by a former incumbent); inceed almost all the Obsaukshpp, of nations having Ministers in Mexico were hold by parties connected with the house of Barron. Mr. Barron, Sr., the father of the young man who is
the partner of the house of Barron, Forbes & Co., immedately commenced proceedings against Don Gomes Farias, (a member of the Mexico.) because he had given evidence against the house of Barron, Forbes & Co., and it is
probable that bribe y would have obtained a verdict from
the courts of the country against the man who had had
the misfortune to have fallen under the anger of Barron,
for having told the truth of a matter that was patent
to all the world of Maxico.

The government of Mexico, aware of the pliant nature
of the ordinary tribunals of that country, in order that no
injustice should be done, took the matter out of the hands
of the tribunals, and assumed the trial of it—a high handed measure certainly, but in the then state of Mexico
perfectly justifiable. Mr. Barron, Sr., thereupon forth
with represented to Lord Palmerston that the tribunals
of the country had been closed against him; that his soo,
the English Consul, had been insulted and bantished,
and that his good name and interests were thereby suifering.

## FINANCIAL AND COMMERCIAL. MONEY MARKET.

Tensnay, Oct. 14-6 P. M. There was a small panic in the stock market this morn ing. The transactions were very large, and there was a great rush to get rid of stocks of all kinds. Most of the mand from that source much lower prices would undoubtedly have been touched. As it is the decline was to some extral. Hittois Central bonds fell off 1/2 per cent; Delaware and Hudson, 1/4; Canton Company, 1/4; New York Central Railroad, M; Eric, 1; Reading 1/4; Michigan Central, 1/4; Michigan Southern, 1/4; Hittois Central, 1/4; Cleve land and Tolede, 1/4; Chicago and Rock Island, 1/4. There were some small low of La Crosse and Milwaukie Heliceso stock sold this morning at 84 a 84 M per cent. This stock is scarce, and holders are not disposed to sell at anything like current prices. Most of the stock is in the hands of parties who have purchased for investment, and the pro-bability is that par would no bring out much. The grant of land just made by the Legislature, amounts to about one and a quarter million of acres, most of which is loca-ted in the very heart of the State of Wiscousin, on the the road, from St. Croix to Superior City, the lands not to be taxed until actually located by settlers. The company are to pay but four pur cent on the gross earnings on that part of the read beyond Portage City, to the State in lieu of all taxes. This is much better than the Illinois Central. That company pays the State seven per cent on the gross carnings in Heu of taxes. The opening of the books of the Eric Railroad Company to morrow appears to have given an impetus to seilers, and certainly the prospect is deci-dedly good fir lower prices. There are sanguino opera tors in Wall street who have not the least doubt in their own minds that Frie will fall back to 55 per cent before large holders must disgorge, and it would be a creat re-tief for them to do so, but they are afraid to put much stock on the market. In the face of a financial panic on both sides of the Atlantic, it requires a great deal of nerve to carry stocks, and it will require a pretty long purse to foot the bill in the end. If the financial pressure on the other side continues sirty days longer, we shall see at the end of that time stocks in this market from three to five per cont below current rates. Erie, Reading, New York Central, and all others, cannot be sustained with money in London worth 5½ a 6 per cent, and on the Continent 6 a 19 per cent. The financial pressure is greater now throughout Europe than at any time during the Russian war, and it looks very much as though it had just commenced. The Bank of England will be compelled to make another advance, so as to prevent a serious drain for the Continent. A suspension of specie payments by the Bank of France is talked of, but it will only be the last alternative.

After the adjournment of the board the following sales of stocks and bonds were made at auction by 8. Dra-

raised the rate of interest. In relation to this movement the circular of Mr. Oegood Field of the 3d inst. says:—
Gold has been arriving freely during the month, but the drain has been more than equal to the supply, and there is consequently a diminished stock of but ion. The advance in the rates of interest all over the Continent, and more especially the recent increase to 5 per cent of the Sanz of France, have competied the Board of Directors in Threadneedle street to raise their terms one-hall per cent. The movement was generally audichasted, and on the day previous to the regular board cay, there was a rush on the bank by the mercantile commonly the apply their wants before the rates were enhanced. Early in the day as much as £1,000,000 of paper had been done, when an extraordizary meeting of the board was called, and the rate put up to 5 per cent. It is the first instance since the panic of 1847 that a change in rate has been made, except on the regular beard day, Thurs day. There has been scarcety any demand for money since the advance, and it is official to put it out on call at the current rates. Both English and American securities have generally declined during the past month, and are inactive and depressed, with the exception of the bonds and shares of the Illnois Gentral Railway, in which considerable business has been done astey.

The prevailing opinion in the financial circles of London at the latest dates, was, that a further advance in the England. The fluctuations in consols, since the previous stoamer, had been very great, and very low prices ha been realized Hermann, Cox & Co.'s Liverpool circul of the 3d'inst. says:-

of the 3d'inst. says:—

The pressure in this market is excessive; the expects advance of ½ per cent in the Bank of England rate discount was made on Wednesday last, and as the ship ments of gold to the Continent confit de, a further rise of the rate is looked for next week. Consols nay fluctuated rather wildly, deciling at one time to 91½ but since tallying close to day at 92½ to ½ for money an account.
